Surgical Hosted

It is a profound honor to be chosen as Chair of the upcoming 9th Latin American FUE Workshop in Cancún, where we are elevating the standards of our field not just through lectures, but through the collective wisdom of over 60 world-class experts. We have designed this event to be a true meeting of minds, featuring a perfectly balanced program of lectures and live surgeries that allows you to watch the very best surgeons perform their techniques—including specialized eyelash, eyebrow, Afro, and Long Hair FUE procedures. This program offers a space where academic rigor meets warm camaraderie, allowing us to debate complex cases and challenge existing paradigms together.

Whether you are focused on medical management or surgical refinement, I invite you to share this unique experience. On behalf of the entire committee, we welcome you and hope you enjoy this wonderful experience with us.

Luis Nader, MD, FISHRS, Diplomate ABHRS
